Table tops

To complete your table base project, we provide a variety of commercial quality table tops to meet your needs. Our table tops are designed to be easy to clean and durable enough to withstand heavy commercial use. Our clients find our solutions durable enough for use in restaurants, bars, hotels, hospitals, and offices, yet stylish enough for residential use. We also provide modern table top options suitable for outdoor patios.

01 / HPL Table Tops

Dear customer :

Here is our compact HPL sheets Specification.
If you are interest, please contact us with no hesitate , We are sure any of your inquiry will get our prompt reply.

High Pressure Laminate (HPL) :

Phenolic compact laminate is a kind of extremely durable structuredecorative and envirmntally friendly board.

It is made from melamine-impregnated resin decorative paper and layers of black or brown phenolic resin krafts: after stacking, compressing them with fluting steel board under high temperature and high pressure which leads to black core, surface riching in colors, styles, and grains

Material of the HPL

Kraft paper:

A type of paper to "Sandwiched" form up the thickness of the HPL board

Phenolic resin:

A chemical acting as a gluing agent to hold the kraft paper together

Decor paper:

The outermost layer which is applied to give the board its appearance

Overlay:

A protective layer applied to the board's surface for dcratch resistant

Tables

When providing a dining room, many people choose modern dining set. Like modern art, modern furniture uses unconventional styles and designs. Modern furniture has little resemblance to traditional but offers the same functionality while taking up less space in many cases. Modern dining tables (and other dining room furniture) have replaced wood with various metals and synthetic materials. In addition, many modern eating parts use color too. Some color combinations help regulate modern tones.
